ABOUT US

Established in the UAE, Electrical & Supply specializes in marine-based components and comprehensive industrial supplies. With years of experience, we provide high-quality solutions for marine, offshore, and industrial sectors, ensuring reliability and efficiency in every product we sell.

MISION

Electrical and Supply is a dynamic company entering the global marine market, committed to supplying high-quality electrical, automation, instrumentation, and pneumatic products in an authentic and reliable manner. As a specialized supplier, E&S focuses on providing premium components for marine vessels (commercial, leisure, and defense) and industrial applications, including petrochemicals, refineries, and more.

We partner with world-leading manufacturers to ensure fast availability, competitive pricing, and efficient global delivery. Our experienced team builds strong customer relationships through expertise, prompt service, and a dedication to quality. Electrical and Supply aims to become a trusted name in the marine supply industry by delivering excellence

WHY CHOOSE US

Your trusted UAE partner for premium marine and industrial components—delivering quality, reliability, and fast service every time.

- Tailored solutions for marine projects and offshore rigs
- Extensive stock for immediate availability
- Competitive pricing with flexible options
- Expert technical support and installation
- Proven success with major UAE clients
- Certified products with warranties
- Eco-friendly options for sustainability

OUR MAIN CLIENTS INCLUDE

Electrical and Supply delivers products all over the world with efficient logistics.

- Maritime Companies
- Shipyards
- Marine Services Companies
- Ship Suppliers
- Navies
- Oil Refineries
- Public Power Corporations
- Food & Chemical Industries
- Panel Builders

OUR SERVICES

SHIP MACHINERY AND RECONDITIONING

Established in the UAE, Electrical & Supply specializes in marine-based components and comprehensive industrial supplies. With years of experience, we provide high-quality solutions for marine, offshore, and industrial sectors, ensuring reliability and efficiency in every product we sell.

MONITORING, ALARM SYSTEM REPAIR AND INSTALLATION

We specialize in the repair, installation, and commissioning of marine monitoring and alarm systems to ensure vessel safety and operational reliability. Our experienced technicians carry out diagnostics, system upgrades, and integration of real-time monitoring solutions, fully compliant with class and marine standards, while minimizing vessel downtime.

AUTOMATION & ELECTRICAL REPAIRS

Our company delivers professional marine automation and electrical repair services for vessels both afloat and in dry dock. Services include troubleshooting, refurbishment, modification, and testing of control panels, motor starters, and automation systems, ensuring safe and efficient vessel operation with rapid response and practical onboard solutions.

CALIBRATION & CERTIFICATION

Electrical & supply company is fully committed to excellence in quality and ongoing technological innovation. Our skilled service engineers support new shipbuilding projects, vessel modifications, and repair operations, responding swiftly to every need. Integrity, reliability, efficiency, and exceptional adaptability define the core values and legacy of our company.

Electrical & Supply delivers precise calibration and certification services for marine control panels and electrical instruments, ensuring full compliance with international maritime standards and class society requirements. Our expert team uses advanced, traceable equipment to verify accuracy and performance, supporting safe vessel operations. These services minimize downtime and provide comprehensive certification documentation for audits and surveys.

PANEL CONSTRUCTIONS

Our technical team comprises qualified Electrical Engineers, Electricians, and Electronics Specialists with strong expertise in marine electrical systems. We design, fabricate, and supply customized control panels tailored to vessel requirements, using high-quality components and modern fabrication tools to deliver compact, reliable, and efficient panel solutions.

CABLES

- House Wires
- Multicore Flexible Cables
- LV Cables
- HV / MV Cables
- EHV Cables
- Signal & Instrumentation Cables
- Rubber cable
- Fire Survival Cables
- Winding wires & Flat Cables
- Communication Cables
- EV Cables

AUTOMATION PRODUCTS

- Programmable Logic Controllers (PLCs) (Compact PLCs, Modular PLCs, Safety PLCs)
- Industrial Controllers (PID Controllers, Temperature Controllers, Process Controllers)
- Variable Frequency Drives (VFDs) (Low-voltage drives, Soft starters, Servo drives)
- HMI Panels (Human Machine Interface) (Touchscreen displays, Operator panels)
- SCADA Systems & Software Solutions (Monitoring & Control Platforms)
- Servo Motors & Servo Amplifiers
- Industrial Communication Modules (Ethernet, Modbus, Profibus, CAN modules)
- I/O Modules (Digital & Analog Input/Output modules)
- Sensors & Transmitters (Position, Temperature, Pressure, Level)
- Power Supplies & Signal Conditioners
- Relay Modules & Interface Modules
- Automation Control Panels (Customized panels for any industrial process)

SWITCHGEARS

- MCCBs (Moulded Case Circuit Breakers)
- ACBs (Air Circuit Breakers)
- MCBs & Distribution Boards
- Contactors & Overload Relays
- Motor Protection Circuit Breakers
- Control Panels & Panel Accessories
- Busbars and Copper Bars

PNEUMATIC ITEMS

- Pneumatic Cylinders (standard, compact, rodless)
- Directional and Solenoid Valves
- Pneumatic Actuators (linear and rotary)
- FRL Units (Filters, Regulators, Lubricators) for air preparation
- Pneumatic Fittings, Tubing, and Hoses
- Pressure Switches, Transmitters, and Gauges
- Control Valves and Manifolds
